About The Healing Seed

Formerly known as Richmond Nature, we've launched The Healing Seed line of personal care products with even cleaner (and greener) formulations based on our core ingredient, virgin organic hempseed oil. The Healing Seed is our new name and we are proud to offer this amazing line of all-natural personal care products that deliver the wonderful benefits of hempseed oil. All of our products contain no parabens, no chemicals or perfumes, no artificial colors and we never test on animals. In addition, our hempseed comes from a sustainable crop.

Hempseed oil is the most nutritious oil on Earth. All of our products are made with virgin organic hempseed oil, drawn by cold pressing the highest-grade hempseeds for the purest quality. What makes this remarkable oil exceptionally nutritious is its composition of essential fatty acids (EFAs), protein and other key vitamins and minerals.

What does this mean on a "good-for-my-skin" level? Well, more than 75% of the EFAs in hempseed oil are poly-unsaturated fatty acids (PUFAs), known for their excellent emollient, lubricating and healing properties. Hempseed oil contains Omega-3 and Omega-6 fatty acids in what is considered to be the perfect ratio of 3:1, as well as Omega-9 fatty acids the rare gamma-linolenic acid (GLA). Providing anti-inflammatory, anti-aging, antioxidant and moisture-balancing properties, the EFAs in the oil are easily absorbed by the skin and compensate for the skin's lower ceramide levels that deplete naturally with aging, thereby reducing the appearance of wrinkles.

At The Healing Seed, we draw upon more than 20 years of experience to formulate our products with the optimal blend of virgin organic hempseed oil to maximize the benefits it brings to your skin and hair. You'll also feel great knowing that our hempseed oil comes from plants that are grown organically and are a completely sustainable crop.
